

# Micro Shear Cutter

## General Precision

**EXCELTA**<sup>®</sup>  
SINCE 1957

The SE-25 has an exceptionally clean and smooth cut. It is light-weight and easy to handle and made from a special carbon steel. The SE-25 has an anti-glare black surface treatment. A slim profile increases access to dense areas. Suitable for closely spaced leads of micro and surface mount components. Designed to cut 20 AWG soft copper wire and component leads. Economically priced and features cutting blades hardened to 54-56C.
