Electronic Digital Caliper

290-1957 Electronic Digital Caliper

Features designed for precision fits or quality checks :

- Precise inside measurements
- Precise outside measurements
- Precise step measurements
- Precise depth measurements

Electronic Digital Caliper

290-1957 Electronic Digital Caliper

Range: 0-6"/0-150mm

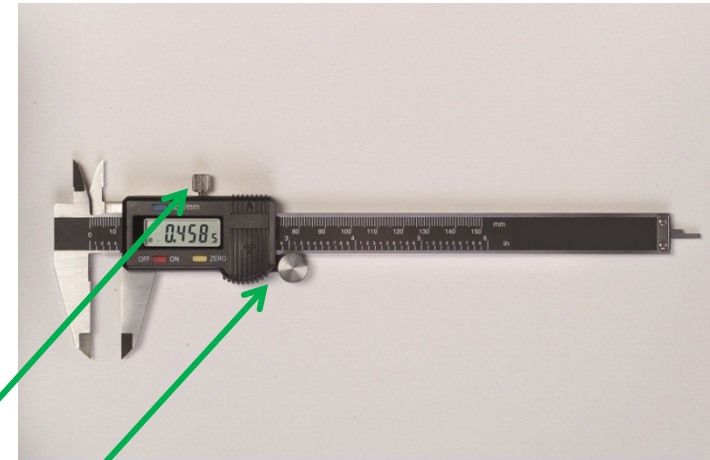

Graduations: 0.0005"/.01mm

Lock Knob: holds the measurement

Thumb Wheel: dials in measurements

Display: digital LCD easy to read numbers

Battery: Button style SR44/357

Electronic Digital Caliper with Fractions

290-1958 Electronic Digital Caliper - unique with fractions

Features for precision fits or quality checks :

- Precise inside measurements
- Precise outside measurements
- Precise step measurements
- Precise depth measurements

Electronic Digital Caliper with Fractions

290-1957 Electronic Digital Caliper

Range: 0-6"/0-150mm

Graduations: 0.0005"/64ths"/.01mm

Lock Knob: holds the measurement

Thumb Wheel: dials in measurements

Display: large digital display reads metric, inches and fractions

Battery: Button style SR44/357

Electronic Digital Micrometer w/Computer Interface

290-1959

1" & 25mm Electronic Digital Micrometer w/ USB cable

Features for precision fits or quality checks :

- **Precise thickness measurements**
 - Check material thickness of critical components for quality
- **Precise outside measurements**
 - Find outside material size for precise mating parts

The Value Leader™

**To learn about the entire TPI product line visit
www.tpi-thevalueleader.com**

Electronic Digital Micrometer w/Computer Interface

290-1959 1" & 25mm Electronic Digital Micrometer

Range: 0-1" or 0-25mm

Graduations: 0.0001" or 0.001mm

Facing end material: long lasting carbide faces

Precision setting control:

- quick turning control for large increments
- thimble control for small increments

Digital Micrometer – Inch Measurements

290-1960 1” Digital Micrometer

Features for precision fits or quality checks :

- **Precise thickness measurements**
 - **Check material thickness of critical components for quality**
- **Precise outside measurements**
 - **Find outside material size for precise mating parts**

The Value Leader™

**To learn about the entire TPI product line visit
www.tpi-thevalueleader.com**

Digital Micrometer – Inch Measurements

290-1960 1" Digital Micrometer

Range:

0-1"

Graduations:

0.0001"

Facing end material: long lasting carbide faces

Precision setting control:

- quick turning control for large increments
- thimble control for small increments

The Value Leader™

**To learn about the entire TPI product line visit
www.tpi-thevalueleader.com**

Digital Micrometer – Metric Measurements

290-1961 25mm Digital Micrometer

Features for precision fits or quality checks :

- **Precise thickness measurements**
 - Check material thickness of critical components for quality
- **Precise outside measurements**
 - Find outside material size for precise mating parts

The Value Leader™

Digital Micrometer Metric Measurements

290-1961 25mm Digital Micrometer

Range: 0-25mm

Graduations: 0.01mm

Facing end material: long lasting carbide faces

Precision setting control:

- quick turning control for large increments
- thimble control for small increments
