

Signal Transformer Awarded ISO 9001:2015 Quality Management System Certification

Inwood, NY [February 26, 2018] [Signal Transformer](#), a Bel group company (NASDAQ: BELFA and BELFB) and global manufacturer of custom and standard transformers, chokes, inductors, transformers and SMD inductors, has achieved ISO 9001:2015 Certification. This certification demonstrates Signal's unwavering commitment to continuous improvement and quality.

Signal Transformer was independently audited by a leading global certification body. The International Organization of Standardization (ISO) is the world's most popular Quality Management System. Major changes to the ISO standard include a global focus on supply chain risk mitigation, continuous improvement and management's commitment to the process. These factors lead to consistent products and services that meet or exceed customer expectations and regulatory requirements, which in turn leads to high levels of performance and customer satisfaction.

Anna Randak, General Manager of Signal Transformer, said: "Signal's continued dedication to quality and customer satisfaction is clear with our new certification to ISO 9001:2015. Our quality team spent the last nine months providing organizational guidance to upgrade our old QMS to this new standard. We are delighted that our hard work and commitment to continuous improvement has been recognized with this certification."

Signal's certificate can be found [here](#). For additional information, please visit belfuse.com/signal. For technical inquiries, call Signal at 866-239-5777 or email sales@signaltransformer.com. Signal products are available through our worldwide distribution network.

About Bel

Bel (www.belfuse.com) designs, manufactures and markets a broad array of products that power, protect and connect electronic circuits. These products are primarily used in the networking, telecommunications, computing, military and aerospace, transportation and broadcasting industries. Bel's product groups include Magnetic Solutions (integrated connector modules, power transformers, power inductors and discrete components), Power Solutions and Protection (front-end, board-mount and industrial power products, module products and circuit protection) and Connectivity Solutions (expanded beam fiber optic, copper-based, RF and RJ connectors and cable assemblies). The Company operates facilities around the world.

Forward-Looking Statements

Except for historical information contained in this press release, the matters discussed in this press release are forward-looking statements that involve risks and uncertainties. Among the factors that could cause actual results to differ materially from such statements are: the market concerns facing our customers; the continuing viability of sectors that rely on our products; the effects of business and economic conditions; difficulties associated with integrating recently acquired companies; capacity and supply constraints or difficulties; product development, commercializing or technological difficulties; the regulatory and trade environment; risks associated with foreign currencies; uncertainties associated with legal proceedings; the market's acceptance of the Company's new products and competitive responses to those new products; and the risk factors detailed from time to time in the Company's SEC reports. In light of the risks and uncertainties, there can be no assurance that any forward-looking statement will in fact prove to be correct. We undertake no obligation to update or revise any forward-looking statement.
