

# Large Head Cutters

Extreme Precision

**EXCELTA**<sup>®</sup>  
SINCE 1957

Ideal for cutting heavier gauge wire, our new line of large head cutters are made of carbon steel with added strength in the head and joint area.

The 7250E & 7251E have a cutting capacity up to 15AWG .060" soft wire. The 7260E & 7261E have a cutting capacity up to 12AWG .080" soft wire. The grips are ergonomically molded plastic and are ESD safe ( $10^{10}$  ohms/sq) with dual leaf springs that provide smooth action.
