

Razor Blades

When Waste Reduction, Performance & Productivity matter, choose Excelta®

- 2 Facet ground blades represent a good balance of sharpness and durability. Primarily for scraping, removal of tapes, adhesives and other materials from hard surfaces. Also used for cutting and trimming non-critical materials like paper, plastics and film.
- Made from 1095 Carbon Steel and hardened to 58-65 Rockwell C.
- 3 Facet ground blades employ a precision ground third angle to increase sharpness. Used for thin or delicate material.
- Washed blades reduce foreign material transfer and were developed for clean room applications.
- Available unwrapped and washed, unwrapped and individually wrapped.
